

**The Hollaender Mfg. Co.**

Originators and Manufacturers of:

- Speed-Rail ®
- Nu-Rail ®
- Rackmaster ®
- Mend-a-Rail ®
- Interna-Rail ®
- Speed-Rail II ®
- Bumble Bee Safety Rail ®

**LEED Criteria**

**Hollaender Railing Systems**

Hollaender Railing Systems consist of fittings that are manufactured in our Cincinnati, Ohio plant, aluminum pipe that is manufactured in Niles, Michigan and metal infill panels that are manufactured in Cleveland, Ohio. All final assembly is in the Cincinnati, Ohio facility.

These products qualify for LEED points as follows:

**MR Credit 2 – Construction Waste Management**

100% of components are recyclable; therefore, scrap producing during construction is diverted from landfills – **2 points**

**MR Credit 4 – Recycled Content**

The sum of postconsumer recycled content plus ½ the pre-consumer recycled content is 10 – 20% of the value of materials, depending on the specific railing design.

10% per the above criteria – **1 point**

**MR Credit 5 – Regional Materials**

Based on the manufacturing location of the components listed above, the following cities would fall within a 500 mile range:

- |                   |                          |                   |
|-------------------|--------------------------|-------------------|
| Chicago, Illinois | Indianapolis, Indiana    | State of Kentucky |
| Columbus, Ohio    | Pittsburgh, Pennsylvania |                   |
| Detroit, Michigan | State of West Virginia   |                   |
- 20% of cost – **2 points**
